

PIPRZ*

[*All dialogue authentically blawn.]

Sheepskin combined with Airtight seasoning is a complete moisture control system that will work for 99% of pipers.

I was told to go to the Ross system for moisture control.

Are these much different that roo bags? Oak-tanned roo hide is the same.

Canmore, nevermore.

Pour the entire bottle of Airtight into the bag. Yes all of it, don't be cheap! You need it all!

I will actually kneel on the bag and bounce up and down. Of course, I perform this maneuver in the bathroom.

I like natural products best.

Have you tried using a rubber mallet and lightly pound the skin together?

I think that with the proper training, a sheepskin bag can be a very good choice for just about anyone.
